

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, MARCH 9, 2006 – 0800 MST
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was heavy nationally with 392 new fires reported. Four new large fires were reported, and six large fires were contained in the Southern Area. Very high to extreme fire indices were reported in Arizona, Colorado, Florida, Texas and Kansas.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

OKLAHOMA FIRE RESPONSE, Oklahoma State. An Oklahoma State Type 2 Incident Management Team (Roberts) is assigned in Shawnee, OK. The Team is assisting local, state, and federal jurisdictions with managing existing fires and initial attack in Oklahoma. Acres, structure losses and costs have been adjusted to represent cumulative ABC Miscellaneous fire activity statewide since January 1.

WEST TEXAS IA, Texas Forest Service. A Texas State Type 2 Incident Management Team (Hannemann) is in place in Granbury, TX. The Team is assisting local jurisdictions with managing existing fires and initial attack within the 220,000 square mile West Zone fire management response area. Large fires within the management area include the Ivanhoe Complex. Acres, structure losses and costs have been adjusted to represent cumulative fire activity for the response area.

BAYOU LABATRE, Alabama Forestry Commission. This fire is eight miles northeast of Bayou Labatre, AL in southern rough. No further information was received.

TWIN HILLS, Oklahoma Division of Forestry. This fire is south of Tulsa, OK in grass. No further information was received.

LILLIAN SWAMP, Alabama Forestry Commission. This fire is in Baldwin County, AL in southern rough. No further information was received.

EMPIRE, Oklahoma Division of Forestry. This fire is five miles north of Empire, OK in grass. No further information was received.

SOONER LAKE, Pawnee Agency, Bureau of Indian Affairs. This fire is 10 miles east of Redrock, OK in grass. No further information was received.

HUNT MILL HOLLOW, Oklahoma Division of Forestry. This fire started on private land nine miles southeast of Stilwell, OK in hardwood litter. No new information was reported. This will be the last report unless new information is received.

SARGE CREEK, Osage Agency, Bureau of Indian Affairs. This fire is one mile east of Burbank, OK in grass. Extreme fire behavior posed a threat to powerlines and farm equipment. The fire will be patrolled today.

OUTLOOK:

Fire Weather Watches: East-central New Mexico, and much of western and southwestern Texas for strong winds and low humidities.

Weather Discussion: Dry and windy conditions will continue today over portions of New Mexico and Texas. Windy conditions will develop over the Ohio and Tennessee Valleys, extending into the Mid-Atlantic states with moderate relative humidity levels. Relative humidity will increase over the Southeast and Florida ahead of an approaching storm system.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southwest Area Partly cloudy most areas, except mostly cloudy from far northern Arizona through the Four Corners region into northern New Mexico. Scattered rain/snow showers far northern sections of Arizona through the northern third of New Mexico.	30 to 50 mountains. 50 to 75 lower elevations.	10 to 20%, except 15 to 30% higher mountains and northeastern Arizona through northern New Mexico.	Southwest to west 10 to 20 mph in many areas; higher gusts east-central New Mexico into eastern New Mexico and west Texas.
Eastern Area Partly cloudy with a chance of showers and thunderstorms across the Mid-Atlantic states.	50 to 60 degrees over New Jersey and eastern Pennsylvania. 60 to 70 degrees across Ohio, West Virginia, Maryland and Delaware.	30 to 40% outside of any scattered showers or storms in the Mid-Atlantic states. Lowest relative humidity levels should mainly occur over Maryland, Delaware, and eastern West Virginia.	South 10 to 20 mph with higher gusts across southern Indiana and the Mid-Atlantic states.
Southern California Scattered showers north, and a chance of light showers south.	35 to 50 mountains. 55 to 65 valleys. 50 to 60 upper deserts. 65 to 75 lower deserts.	45 to 60%.	Southwest to northwest 15 to 25 mph with higher gusts.
Southern Area No information was reported.			
Rocky Mountain Area No information was reported.

VEHICLE ENTRAPMENT

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Fire out around the vehicle if there is time.
- Park behind a natural barrier or structure.
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles or draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on.
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters with reflective material placed against window.
- You must protect your airway, remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
 - Temperatures may reach over 200 degrees Fahrenheit.
 - Smoke and sparks may enter the vehicle.
 - Plastic parts may start to melt and give off toxic gases.
 - Windows may start to crack.
 - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
 - Each crewmember should cover himself/herself with a fire shelter.
 - Exit the vehicle from the side away from the greatest heat.
 - Stay together and get as low to the ground as possible, moving away from the vehicle.
 - Deploy your shelter in a safe area.
